

Personal website: <http://logothetidis.wordpress.com>

Prof. Logothetidis is the founder and director of the Nanotechnology Center LTFN/COPE-Nano at Aristotle University of Thessaloniki. He has internationally recognized research and innovative leadership in Advanced Materials, Nanotechnologies, Thin Films, Organic Electronics, and Nanomedicine. He coordinated 130 European Union & Nationally Funded R&I Project with a budget >250M€, with >400 peer review publications and 15 patents. He is the Founder and General Director of OET. He is the Creator and President of the Hellenic Organic and Printed Electronics Association (HOPE-A), which has as members 40 high-tech firms, and has established partnerships with 6 similar organizations worldwide. He is responsible for founding 4 start-up companies: Nano Coat, OET, BL NanoBiomed, and VK Nano. He is the organizer of the annual

NANOTECHNOLOGY multi-event (www.nanotechnology.com) since 2004, and the Founder and Coordinator of the NANONET Thematic Network (www.nano-net.gr) since 2003, with 650 Universities, Research Centers and Companies as members all over the world. He is the founder of the Post-Graduate Program “Nanosciences & Nanotechnologies” (<http://nn.physics.auth.gr>). His research activity and excellence has generated over 1000 papers and review articles in International Journals & Conferences and 700 keynote and invited talks. He is the author of over 360 peer-reviewed papers, 6 books and 15 patents, and has received over 15700 citations holding a h-index=61.
